Controls: Pod controls have been put back into headphone mode and speaker mode. True by 7.1 sound is actually produced by seven speakers. The virtual surround effect (7.1 Surround Sound, Virtual 7.1 Sound or True 7.1 sound) simulates the surround effect in the air by using surround effects from multiple speakers. The surround effect will be true to the real surround sound, and will not be oversimulated. Why 3D magnetic sensors? 3D magnetic sensors eliminate unwanted vibration from the headphone axis, making sure that sound is delivered in a balanced way to your ears. The 3D design also ensures that the sensor fits comfortably in your ear, with no chance of being dislodged. The magnet that generates the signal sits on top of the 3D sensors, so that they are not in direct contact with the ear, and thus avoids any unwanted loss of sound quality or overheating. 3D VR (Virtual Reality) technology The VR compatibility comes from a dedicated circuit which adjusts the earpieces to fit the user's ears, while bringing the 3D sound to life. The VR Headset will work with your desktop, laptop, and mobile device, including smartphones, tablets, and gaming consoles, while automatically adjusting the headset to fit your ear shape. The 3D VR (Virtual Reality) technology creates a true, immersive 3D audio experience, that is fully customized to suit your personal needs. You can now immerse yourself into amazing games and videos with the sensation of feeling immersed in an action movie with extraordinary realism and a wide, realistic soundscape. Zoom in on the details and you will hear sounds that will blow your mind away. The user can adjust to a more or less compressed sound experience and still receive a very clear audio, which will be enjoyable to your ears. Why choose Killer Audio? Killer Audio wants to offer you the best deals in audio. We work for our customers, and give you what you want. We are passionate about audio, and think about you as an important partner.

We are glad to offer you, our customers, great deals and discounts. We are especially happy to have brought our users some great deals, which were actually more expensive than we expected. The headphone market is quite competitive. We offer a solid solution in an attractive price. We have not only the best earphones that we can offer, but also a very competitive price. 82157476af
